Leadless

NL SERIES

These revolutionary, high reliability leadless (wound chip) inductors have been developed in response to the trend toward higher density mounting of parts in electronic circuits. Since metal terminals are used as the electrodes and the body is molded of heat resistant resin, these inductors offer many superior features.

The NLC series is designed to eliminate EMI in power lines and have rated current in the range from 60 to 1800mA. NLC series has only half as much DC resistance and twice as much DC current.

Features

- Leaching resistant terminations due to metal tab electrodes.
- Coils encapsulated in heat-proof resin make highly accurate dimensions and resistance to mechanical shock or pressure.
- High resistance to heat and humidity.
- Matched parts on tape and reel.

Tape and Reel:

NL1008, NL1210, NLC1210—2,000 pieces per reel

NL1812, NLF1812, NLC1812—500 pieces per reel

NL2220, NLC2220—400 pieces per reel

Applications

- Telecommunications
- Measuring and medical equipment
- Computer and peripherals
